

## **Effectene Transfection of HeLa cells**

### Transfection Solution:

Add 2 ug of DNA to a sterile Eppendorf, along with 250 ul of Buffer EC.

Add 16 ul of Enhancer solution, vortex and let stand 5 min at room temp.

Add 25 ul of Effectene solution, vortex and let stand 5 min at room temp.

Add solution to cells, swirl to mix and put cells back in the incubator. Check expression after 8-24 hours.
